

KEABOU NGUEMATIO THOMSON

SOFTWARE ENGINEER

Yaounde Cameroon / Remote | thomsonnguems@gmail.com | thommysart.me

SUMMARY

Creative designer blending clean visuals with strong technical skills. Experienced in shaping smooth interfaces, building responsive layouts, and improving user journeys. Skilled in blending visuals with logic using tools for layout design, prototyping, and front-end development.

EDUCATION

Oct 2022 - Jul 2025

Bachelor of Science in Computer Science
The ICT University Yaounde

EXPERIENCE

UI/UX Consultant (Freelance) - Yaaki

Jan 2026 - Feb 2026

- **Audited** e-commerce and discovery platforms to propose high-fidelity **interactions** and **motion design** systems.
- Executed frontend **regression testing** to ensure UI consistency and functional integrity accross the different web pages.
- Worked closely with both the design and development teams to identify and rectify errors from either side, ensuring **optimal** results.

Software Engineer (Freelance) - Enderix Finance

Oct 2025 - Present

- Architected and developed Enderix Finance, a modern **ERP platform** for Cameroonian enterprises, using **Next.js**, Tailwind CSS, and **Convex**, deployed on **Vercel**
- Led a cross-functional team of 2 engineers and 2 consultants to deliver a full-stack SaaS solution featuring authentication (**Clerk**), real-time data, and a component-driven UI (**shadcn/ui**)
- Delivered end-to-end ERP functionality as a freelance contract, owning both frontend architecture and backend data modeling for enterprise clients in the Cameroonian market

reframe/ui - Personal Business

Aug 2025 - Present

- The most **advanced UI kit** built for designers and frontend developers who want to craft **Awwwards-level** websites without compromise. Inspired by the world's **top digital experiences**, reframe/ui delivers a suite of **high-impact**, production-ready components and templates that bridge the gap between experimental design and real-world **shipping speed**. Check it out at ui.thommysart.me

Frontend Intern - Next-It Solutions

Dec 2024 - Feb 2025

- Built intuitive marketplace interfaces and dashboards with **React.js**, **TailwindCSS**, and **Redux**, improving usability and performance. Optimized **API data fetching** to cut load times and reduce server strain. Contributed to influencer features and promotions that enhanced engagement and revenue potential.

SKILLS

- Frontend: React, Expo/React-Native, Next.js, GSAP, Framer Motion, Three.js
- Backend: Convex, Supabase, Typescript, Express.js, FastAPI
- Design: Figma, Canva
- Tools: Cursor, ChatGPT Codex, Notion, Vercel
